This Health IT Module is compliant with the ONC Certification Criteria for Health IT and has been certified by an ONC-ACB in accordance with the applicable certification criteria adopted by the Secretary of Health and Human Services. This certification does not represent an endorsement by the U.S. Department of Health and Human Services.

Contractual Obligations:

Each practice is required to sign a License Agreement upon purchase of Optivate EHR, which covers all providers using the EMR within that practice. In addition, in order to receive ongoing updates and releases, the practice needs to enter into a maintenance agreement based on number of providers, which is renewable every year.

For a full list of contractual obligations please refer to your license agreement. This disclosure can be found by visiting <https://www.optivatehealth.com/compliance/>.

Multi-Factor Authentication (MFA) Use Cases

Optivate EHR supports multi-factor authentication (MFA) in accordance with the Office of the National Coordinator for Health Information Technology (ONC) certification criterion at 45 C.F.R. § 170.315(d)(13) for both user login and Electronic Prescribing of Controlled Substances (EPCS).

- User Login: Optivate EHR provides a built-in MFA solution for user authentication that does not require a third-party application. This feature is included at no additional cost.
- Electronic Prescribing of Controlled Substances (EPCS): MFA for EPCS is provided through the integrated authentication service offered by NewCrop. Users complete MFA through the NewCrop workflow. This feature is included at no additional cost.
